## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weidman et al. in view of Lee.

There is disclosed in Weidman a hot beverage maker comprising: a stand 11; a removable brewed beverage tank 16; a filter basket 18 mounted inside of the tank; a reservoir portion (lower portion) of the tank; an outlet port 29 positioned substantially at the bottom of the tank; a dispenser actuator 17 connected to the outlet port; a warmer plate 71; a fresh water chamber 14; and a hot water shower head 50 connected via tube 48 to the water chamber.

Lee discloses a push button dispenser actuator including a plug 350 comprising a stem 362 and a seal ring 358 wherein the lower portion of the stem has a substantially inverted conical shape.

It would have been obvious to one skilled in the art to substitute the dispenser and actuator arrangement of Weidman with that disclosed in Lee, in order to provide an alternative means for dispensing liquid from the brewed beverage tank.

### ***Conclusion***

Art Unit: 1761

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Rixen and Liu et al. are cited for their disclosure of the state of the art.
